## Oklahoma Are the impacts you care about reflected in your cost-effectiveness tests? Included in state test Does your state's cost-effectiveness test **KEY** account for the full range of utility system Not included impacts? Does the Avoided Credit in state test and Collection test account for nonutility impacts that align with applicable energy policies? Some states are Avoided answering these Shareholder **Environmental** questions using the **Utility Impacts Incentive Costs** Compliance National Standard Costs\* Practice Manual framework. See case Avoided Costs Avoided of Complying Marginal studies here. Energy Costs with RPS Wholesale Price What can you do to Suppression improve your state's energy efficiency/DER cost-effectiveness tests? See our guide on legislative language here. Low-Income Measure Energy Satisfaction Customers Security Costs **Economic** Health and OTHER Development **Asset Value** Other Fuel Safety and Jobs **PARTICIPANT NON-UTILITY IMPACTS IMPACTS Productivity Public** Water Comfort Health Resource **Economic** Environ-Well-Being mental

\*Although "Avoided Environmental Compliance Costs" is one category in the DSESP, some jurisdictions and benefit-cost analysis models further detail this category. If the category is gray, your state does not account for any such impacts. If the category is blue, your state accounts for at least one impact in this category.

Use the <u>Database of State Efficiency Screening Practices (DSESP)</u> to view state energy efficiency cost-effectiveness testing practices and guidance documents.
